

ABOUT THE FUND

The Plato Global Alpha Fund (the ‘Fund’) aims to outperform the MSCI World Net Returns Unhedged Index by 4% p.a. (after fees) over the medium-long term. The Fund uses an all-weather investment style that seeks to deliver consistent alpha over the cycle.

MONTHLY COMMENTARY

The Plato Global Alpha Fund delivered an impressive return of 6.70% in November (after fees), outperforming the MSCI World benchmark, which rose 5.16%. Year to date, the Fund is up 46.4%, having surpassed the MSCI World in ten out of eleven months. Since inception, the Fund has achieved an annualised return of 22.85% after fees, outperforming the benchmark by 11.02% per annum and delivering positive relative performance in 92% of rolling quarters. Our upside capture ratio stands at 126%, while the downside capture is just 74%, underscoring our strong risk-adjusted performance. The Fund is now ranked 2nd out of 262 funds in the Morningstar World Large Cap universe since inception and has grown to \$299 million in assets under management. On the 25th of November we launched the Plato Global Alpha Complex ETF (ASX:PGA1), making the strategy accessible on market.

November was defined by Trump’s landslide victory and an accompanying surge in U.S. assets and the U.S. dollar. Deep cyclical, high beta sectors prospered, with retail favourites and high growth, low margin companies performing particularly well. In a repeat of October, China ADRs sold off as investors fretted over the impact of potential tariffs. Despite the sharp market moves, the Plato Global Alpha Fund managed to outperform the MSCI World by over 1.5%. Over the past year, standout contributors to our performance have included NVIDIA, Meta Platforms, and Broadcom, which have returned 201%, 79%, and 81%, respectively. Our strategy continues to deliver strong results, balancing upside potential with disciplined risk management.

Companies mentioned are illustrative only and not a recommendation to buy or sell any particular security.
